EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Deborah S. Gladstein on 10/16/2006.

The application has been amended as follows:

In claim 1, at line 15:

"...wherein side surfaces of the part of the second cladding layer and the contact layer constituting the ridge portion are covered with the light confinement layer and the dielectric film.", and has been changed to:

- - - ...wherein side surfaces of the contact layer and the part of the second cladding constituting the ridge portion are covered with the light confinement layer and the dielectric film, and wherein the light confinement layer is substantially flat. - - -

The following is an examiner's statement of reasons for allowance:

Claim 1 is believed to be allowable as a semiconductor laser device having the stated structural limitations, including the contact and second cladding layers forming a ridge, a light confinement layer found in an area not on top of the ridge and covered by a dielectric film, where the light confinement layer does not function to block current,

Art Unit: 2828

and the light confinement layer and film cover the sides of the ridge portion, and finally that the confinement layer is substantially flat, was not found to be taught by the prior art. Prior art such as 6031858 was found to teach similar device structure, but lacked the side surfaces of the contact layer being covered by a film and the confinement layers. US 5963572 and US 6778575 were also found to teach similar structures, but both failed to teach significantly flat confinement layers. The majority of the prior art was found to teach confinement layers that were either current blocking, did not (along with a dielectric film) cover the sides of the ridge portion, or were not substantially flat. As the prior art failed to teach the stated device limitations, or present clear motivation to combine said limitations, the claim is believed to be in condition for allowance.

Claims 2-5 and 7-9 are allowable as they depend from allowable claim 1.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
